

# Installation Guide - Solar Bankers IPFS

Linux version

- 1) Download the zip file
- 2) Extract the solar\_ipfs folder in the Home folder
- 3) Open the terminal
- 4) Type 'chmod -R 777 solar\_ipfs' and press enter
- 5) Type 'cd solar\_ipfs' and press enter
- 6) Type './InstallSolarIPFS.sh' and press enter
- 7) When the process is completed, purchase a subscription key at <https://solarbankers.com/IPFSPayment/>. The subscription key will be sent to your email. When received, place it in the .ipfs folder found in the Home folder (it is a hidden folder. To see hidden folders, hold CTRL+H).
- 8) Go back to the terminal
- 9) Type './startSolarIPFS.sh' and press enter
- 10) If everything worked smoothly, the last message appearing on the command prompt windows should be 'Daemon is ready'. Keep this window open.
- 11) Visit <https://solarbankers.com/IPFS/#/> and enjoy.
