

Installation Guide - Solar Bankers IPFS

Windows version

- 1) Install cURL for your operative system (32 or 64 bit). Choose the version with administrator privileges (<http://www.confusedbycode.com/curl/#downloads>)
- 2) Download the zip file
- 3) Extract the solaripfs folder in the directory C:/
- 4) Open the command prompt
- 5) Type 'cd C:\' and press enter
- 6) Type 'cd solaripfs' and press enter
- 7) Type 'init.bat' and press enter. This will install the Solar Bankers IPFS software
- 8) When the process is completed, type 'startIPFS.bat' and press enter. A counter should start. Leave the command prompt window open
- 9) Purchase a subscription key at <https://solarbankers.com/IPFSPayment/>. The subscription key will be sent to your email. When received, place it in the .ipfs folder found in your Username folder.
- 10) Open another command prompt windows
- 11) Type 'cd C:\' and press enter
- 12) Type 'cd solaripfs' and press enter
- 13) Type 'solaripfs.exe daemon'.
- 14) If everything worked smoothly, the last message appearing on the command prompt windows should be 'Daemon is ready'. Keep also this window open.
- 15) Visit <https://solarbankers.com/IPFS/#/> and enjoy
